

Right of Way Construction Permit

Date: _____

Permit Number: _____

This permit is issued to: _____
for the purpose of constructing a: _____
in the public right of way in Keith County, Nebraska in the following location: _____

\$25.00 Permit Fee

The required vertical headroom under the County road ditch shall be 3' (three feet) minimum and below the flow line of any existing culvert. All trench installations shall be mechanically tamped to the full width of the right of way to preclude the possibility of settlement in the roadway and ditches, and shall be compacted to 95% of compaction. The utility owner will be responsible for any additional gravel that is required and for seeding any disturbed areas with a reliable game commission mix. The utility owner will be responsible for any damages created from erosion due to channelization of water from the utility installation. The utility owner will be responsible for moving said utility if County road construction requires and at NO cost to Keith County.

The construction of all utilities will conform to the standards set forth in the "Nebraska Department of Roads-Policy for accommodating utilities on State Highway right-of-way." Adopted by Keith County as the "Keith County Policy for accommodating utilities on public road right-of-way." The permit holder shall inform the Keith County Highway Department upon completion of construction of the above-described utility in order that all road crossings and backfill areas may be inspected. The permit holder agrees it will restore the public roads and related structures where it, or any of its contractors, will be working to the same condition as they were prior to it's work, and will accomplish such restoration to the reasonable satisfaction of the Keith County officials. The permit holder shall also exempt Keith County from any damage that may result to the above-described utility as a result of future road maintenance or construction. All utilities, electric, water, gas, etc. shall be cased, unless otherwise specified. The holder of this permit SHALL be responsible for work zone safety, and the proper signage in accordance with the MUTCD manual.

Any accesses adjoining paved roads will require a lug to be installed at applicant's expense.
